KING SPOOL

FOR SEWING THREADS

polypropylene plastic - weight: 27 grams

The king spool is the essential solution for winding sewing threads, textured yarns, and high-tenacity technical threads (such as nylon and polyester). It is designed to ensure smooth and consistent yarn feed without the loops falling off or getting caught under the bobbin during high-speed sewing. Made of 100% recyclable polypropylene plastic, available in 30 colors of your choice.
